

LIAO YANG JIA XIN CARBIDE CO., LTD.

We can provide graphite powder and all kinds of graphite product

Natural flake graphite product size : 100 mesh , 200mesh , 300mesh fixed carbon : 85% 90%92% 95% Quantity :atyour request

Graphite products extensive use and fields such as metallurgy ,chemical industry, non-ferrous metal , semiconductor, machinery ,grinding apparatus ,aeronautics and astronautics .

According to graphite production method , it can be divide into isotropy graphite , squeeze molding graphite , mould pressing molding graphite .

According to characteristic property , it can be divide into high-purity graphite , high strong graphite , high density graphite .

Because treating producing method , oneself characteristic property and using field' s difference ,graphite is accomplished with different the type products such as graphite electrode , graphite heating element ,graphite rotors , crucible, mould , electric conduction roller , mill furnace inner lining , mill furnace pedestal prepare a module , machinery seals off the carbon ring , graphite bearing .

We are looking for your inquiry
